Contact: Vincent Skidmore

Date Prepared: November 2017

Section 1 – Product Identification

Product Name: ***Skidmore's Leather Cream***

Chemical Name: na

Formula: na

Formula Weight: na

Chemical Family: mixture, natural products

Section 2 – Hazards Identification

Classification: This product is considered non-hazardous according to the OSHA Hazard Communication (29 CFR 1910.1200).

GHS Label: Symbols: not applicable

Hazard Statements: None

Section 3 – Composition/Information on Ingredients

Components	CAS Number
Beeswax	8012-89-3
Heavy paraffinic distillate	64742-54-7

Section 4 – First Aid Measures

Description of First Aid Measures

Eyes: No specific procedures required.

In case of eye contact, remove contact lenses if worn, flush eyes with water.

Skin: No specific first aid measures required: wash off with soap and water.

Ingestion: No specific first aid measures required. Do not induce vomiting.

Inhalation: No specific first aid measures required.

In case of excessive levels of material in the air, move to fresh air.

Section 5 – Firefighting Measures

Fire Extinguishing Media: water fog, foam, carbon dioxide, dry chemical

Firefighting precautions: This product is not easily ignited, but will burn under extreme heat and oxidizing conditions.

Section 6 – Accidental Release Measures

Protective Precautions: Eliminate sources of ignition in vicinity of spilled material.

Spill Management: Contain spill and clean up with shovel or broom, transferring waste to closed container for disposal.

Section 7 – Handling and Storage

Store in cool place (ambient or lower temperature) in tightly closed container.

Section 8 – Exposure Control / Personal Protection

Contains no substances with occupational exposure limit values.

No special personal protection required.

No special environmental precautions required

Section 9 – Physical and Chemical Properties

Physical State: semi-solid

Appearance, Odor: yellowish cream color; faint aroma

Specific Gravity: 0.92

Melting Point: 90°F

Solubility in Water: slightly soluble in water; forms a creamy-white emulsion in warm water

Volatile Organic Components, by weight: less than 10 ppm (mg/kg)

Section 10 – Stability and Reactivity

Reactivity: This material is stable under normal conditions of use.

Chemical Stability: Stable under normal conditions.

Hazardous Reactions: Avoid strong oxidizing agents.

Decomposition Products: Thermal decomposition can produce a variety of products which may include oxides of carbon and nitrogen.

Section 11 – Toxicological Information

No toxicological data available.

Section 12 – Ecological Information

No data available. Not expected to be harmful to aquatic organisms.

Section 13 – Disposal Considerations

Use product for its intended purpose.

Section 14 – Transport Information

Not regulated as hazardous material.

Section 15 – Regulatory Information

This product contains no product subject to reporting requirements.

Section 16 – Other Information

Note: *The information above is believed to be accurate and represents the best information available to us. It is the user's responsibility to determine the suitability of this information to their specific purpose.*
